

New C.P.R. Station at Montreal

Costing well over \$500,000, with a frontage of 224 feet, a depth of 87 and maximum height of 65 feet in three stories, the new Canadian Pacific Park Avenue station in the north end of Montreal, contract for which has been let, is slated for completion by October of this year. It will be of combined classical and modern architecture of stone and marble construction and will be a very handsome addition to a part of the city which of late years has grown into one of the finest residential sections of any city in the Dominion. The new

station will be approached through an ornamental garden which will be circled, anti-clockwise, by vehicular traffic and there will also be a side entrance from a new north-and-south street for passengers arriving or leaving by tramcars. It will afford additional service to residents of the northern sections of Montreal and is evidence of the ever-growing traffic on the railway from and to the city into the Place Viger station and in the Laurentian district. Photograph shows architect's drawing of the new station as it will appear when completed.

Robert Gardiner, M.P. Is New President of the United Farmers of Alberta

H. W. Wood, Veteran President, Retires
after Fifteen Years Unbroken Service

Four Business Places Wiped Out in Midnight Fire at Sibbald Saturday

A fire which started at the back of Ball's store on the west side of Main street, Sibbald, about midnight last Saturday, wiped out four business establishments before it was checked.

The places destroyed were Ball's store general merchandise, Chinese restaurant, Stewart's implement office and warehouse and Gray's Pool room and barber shop. Losses are reported to be partially covered by insurance.

Splendid work was done by a large band of volunteer firefighters in checking the blaze at Hunter's meat market, which is situated one lot north of the pool room, the last building to be destroyed. It is not definitely known yet what rebuilding will be done.

Oyen Rinks Win Beaver Cup at Chinook

Two rinks from Oyen were visitors at Chinook last Saturday evening to play for the Beaver Cup. The games were witnessed by a large "gallery" and provided many thrills, the score being close right to end of the game. Several times the score was tied during the play.

Batts of Chinook playing against Stephenson were two up at the conclusion of their game; meanwhile, Lees went into the twelfth end one up on Milligan (leaving Oyen one down with one end to go). When Lees went to shoot his last rock, he had one counter and debated scoring the end and have each rink play an extra end or try for a second counter. The latter play was decided on and Lees made a perfect wick shot which rolled neatly to the button for the winning point.

The players were entertained at an enjoyable supper after the games. The personnel of the competing rinks was as follows:

OYEN	CHINOOK
G. Langmuir	W. Hurley
A. E. Johnson	W. Todd
R. J. Scott	M. Chapman
T. Lees, sk.	W. Milligan, sk.
E. G. Evans	H. Smith
Jas. Lees	C. Peterson
C. Stewart	R. Morrison
T. Stephenson, sk.	H. Batts, sk.

Result: Oyen 1 up.

IN LIGHTER VEIN

"Did you 'tend yore lodge meetin' las' nite, Rastus?"
No, sah; no, sah; we dun hab to pos pone dat meetin'. Seems like De Grand All Powerful Invincible Most Supreme Unconquerable Potentate, dun got heat up by his wife."

At the twenty-third annual convention of the United Farmers of Alberta, in session in Calgary this week, Robert Gardiner, M.P. for Acadia, was today elected president of the organization by acclamation.

Three nominations for the presidency were placed before the convention; Mr. W. H. Wood, Hugh Critchlow of Barrhead and Robert Gardiner, federal member for Acadia. Mr. Critchlow promptly withdrew his name, and the veteran president followed by withdrawing his name and asking the members to give the same loyal support to the new president as had been accorded him in the past.

Expression of Thanks

Through the columns of the News we wish to express our thanks to all who so willingly helped to check the fire in our town of Sibbald, on Jan. 17, and especially do we thank those who helped to salvage goods from our store. We are indeed grateful to the many farmers and neighbouring townspeople for their speedy arrival and those who came prepared with every means of fighting equipment they had at their disposal. The operators of our telephone system are deserving of great credit for the way they stayed on duty.

To Constable Green of Oyen we are particularly grateful for the speedy response to our call, and for his untiring and successful efforts in directing the many willing helpers in saving what is left of the business section.

In sincerity we again say "Thank you all" for both your assistance and kindness shown.
—James and Margaret Stewart.

Keep Cool.

Foreign Minister Briand, of France, was recently taken to task by one of the Nationalists who charged him with lack of firmness in dealing with the existing situation, answered with some show of spirit: "I believe the best service one can render his country just now is by remaining cool."

Another state executive, Marcus Aurelius, gave practically the same counsel in the second century of this era when he said: "Do not be whirled about, but in every movement have respect to justice, and on the occasion of every impression maintain the faculty of understanding." Dr. more briefly, keep cool.

The advice to keep cool, says a United States publication, is sound advice to every one of us at the beginning of 1931. True, it is not new advice at all times. The advice will be just as sound at the end of 1931 as at the beginning, and at all time intervening. The two quotations above demonstrate this, inasmuch as the advice tendered by an outstanding statesman of the twentieth century is repeated by one of our leading world statesmen in the twentieth century. The words used may be different, but the meaning is the same.

Do not be whirled about. Keep cool.

When the stream of life is flowing evenly toward its destined port or goal, following a well marked channel, with hardly a ripple on the surface, it is comparatively easy to keep cool. There is nothing to whirl us about, and in the resultant tide of prosperity we pride ourselves on our strength and buoyancy of the stability and greatness of our country.

But it is when, feeling thus safe from a sense of false security, whether in our individual or national life, we are met with a sudden disaster, that we learn the value of the advice. When the storm breaks and the hurricane roars, and the ship is tossed and whirled about, it is essential that the captain remain cool and not whirled about.

"As old world is just now in a 'storm centre'." It is passing through it; in time it will emerge. But it is now that we must all keep cool; it is now that it would be fatal to be whirled about. The present is not the time to abandon the old charts which have guided us in the past. Now is not the time to throw the compass overboard, and mutiny against the captain. When we have finally emerged from the present difficulty we should, of course, take stock of our harrowing experience, and endeavor to devise ways and means to prevent or lessen the force of another such storm. But while the storm rages, keep cool.

Keep busy; work harder than ever before and work cheerfully, knowing that thereby the present task will be made the easier. Keep cool, keep cool, the faculty of understanding in full play; take alert advantage of every opportunity. Don't be stampeded and don't be discouraged. Let every one put his shoulder to the wheel and all push together.

To one and all now and for every day of this year, is presented the admonition of the ancient Philistine leader: "Be strong, and quit yourselves like men."

Vast Gold Field in Japan

Vegetables From U.S.

Mining Engineers Discover One Of Unprecedented Wealth

A gold field, which is declared to be of unprecedented extent and wealth, has been discovered in Formosa by mining engineers representing the Tokio Imperial University. Dr. Jishiro Yokoyama, head of the expedition, estimates the amount of gold available to aggregate \$2,500,000. The deposits, he said, extend for approximately 150 miles and are alluvial in nature. "I actually picked up gold dust in river beds in the mountains on the plains and even on the streets of small villages," Dr. Yokoyama said.

World Wants More Gold

Gold is one commodity in which there appears no threat of a surplus. The world is constantly crying out for more. From Australia comes word that New South Wales has gone the length of bonusing the industry by paying half the actual working costs of prospectors and offering other inducements. It is said that there are over 1,000 prospectors out in that state.

What Price Ugly

Judging from an incident which occurred recently at the Halifax Technical school, Regina, that city might still be in the wastes of snow and ice for all one gentleman knows and knew about it. The man delivered a science catalogue to the technical school mailed from London, England, after (last) evening his equipment, and he was dressed simply. "Science Master, High School, Regina, North West Territories." What price glory, Saskatchewan?

Canada Cool

New Scotia, New Brunswick, British Columbia and the Yukon produce only bituminous coal; the Saskatchewan mines yield lignite only; Alberta produces bituminous coal, sub-bituminous and lignite, and formerly also mined some anthracite.

Was Weak and Run Down Could Scarcely Do Housework

Mrs. Edward A. Allen, Benning, Alta., writes: "I would like to tell you of the great benefit I have received from your Milburn's Heart Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework. In fact I would have to be down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box twice with me, and was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50c a box

Sold by all drugg and general stores, or mailed direct on receipt of price by The Milburn Co., Ltd., Toronto, Ont.

Nations Warned Against Russia

Trading With Soviets Provinces Funds To Finance Revolution

A special cable from London to the Toronto Globe says:

"The President of the Bureau of the International Entente against the Third International has issued a serious warning to the nations of the world, through the Geneva press, against Russia's five-year plan. His pronouncement says in part:

"Whoever buys goods coming from Russia helps to provide the Russian government with the funds which it needs to maintain its dictatorship and to finance revolution, in the purchase of food and other articles of prime necessity from which these people are suffering."

"Whoever sells to the Soviet government, directly or indirectly, receives in payment money of doubtful origin, contributes to the realization of the 'five-year plan,' a war machine of which the workers will be the first victims, directed against the prosperity of other nations."

Overwork or Worry

Taxes the Health Of Thousands Of Young Girls

In the "teen-age" years when school office work is so much an outside activity, their health may be taxed. Many girls, under the strain of their school work, may find themselves in a state of complete breakdown. Their heart would palpitate at the least exertion. I could not sleep at night. I agreed with me. I began taking Dr. Williams' Pink Pills for Pale People. I gained in weight and every disconcerting symptom left. Dr. Williams' Pink Pills for Pale People are sold by medicine dealers or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Noise Has Been "Harnessed"

Acoustic Paint Assures Quietness In Toronto's New Bank Building

Once again science has mastered an ostensible physical impossibility. Since noise cannot be eradicated, the first findings they have been confronted with the seemingly impossible task of making a building soundless. G. R. Anderson, of the University of Toronto department of engineering physics, has proven acoustics can be controlled and that howling noises and echoes can be eliminated from our buildings.

On the sixth floor of the new Bank of Commerce building, at King and Jordan Streets, Prof. Anderson demonstrated how special construction treatment can prevent the sound of sounds produced becoming chaotic, clamorous noises. The glass pane walling will be the quietest office structure in Toronto. Rooms that have been traditionally treated will be 20 per cent quieter than the others and it is predicted the efficiency of staffs will be enhanced 15 per cent.

Eradication of disagreeing noises is accomplished largely by the evolution of a new type of acoustic paint.

Miller's Iron Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effect where the child suffers from loss of appetite. In few cases conditions they will be found useful and they will serve to soothe and griping in the stomach, from which children so often suffer.

Agriculture Needs Help

Ways and means have been devised for helping all the industries except agriculture. Thought should be directed at once to a policy that will bolster up farming, which is the basis of the nation's wealth. It can be made even today a more profitable industry than any other. It will derive more benefit from the reformed property than the others ever have. It will enjoy from a tariff as high as the peace power on Parliament Hill. Farmers Advocate.

What Price Ugly

Judging from an incident which occurred recently at the Halifax Technical school, Regina, that city might still be in the wastes of snow and ice for all one gentleman knows and knew about it. The man delivered a science catalogue to the technical school mailed from London, England, after (last) evening his equipment, and he was dressed simply. "Science Master, High School, Regina, North West Territories." What price glory, Saskatchewan?

Five Boys—

Best Evidence.

Mrs. Corcoran, of Leigh, writes:—"I suffered with biliousness accompanied by sick headaches for days at a time, and every medicine I tried failed to bring relief. A friend gave me some of your wonderful Carter's Little Liver Pills and the first dose gave me great relief. For three years I have taken them every night as a regulator and I find they prevent these bilious and sick headaches attacks. I have five little boys and I give them three or four every week. I have great faith in them. Take Carter's Little Liver Pills. All druggists sell them and 75c per box."

New Laws In England

Varied Collection Of New Legal Enactments Arr In Force

Whether New Year resolutions the English citizen may make, he will find himself facing a varied collection of new legal enactments.

The standard rate of income tax goes up another 2 1/2 per cent, on the whole substantial incomes, though there is a reduction of the tax on incomes of the lowest categories.

The motorists encounter a shab of new regulations under the Road Traffic act, most important from a personal viewpoint being the compulsory insurance against third party risks. The speed limit is abolished for private cars and motorcycles. Hospitals will be entitled to charge up to \$125 for expenses incurred in treating accident victims. Hairdressers and barbers' shops will close compulsory on Sundays. Jewish merchants may operate on Sundays if they close on Saturdays. The Irish Free State incidentally is promoting a bill to make barrister a closed profession, to be followed only by legally recognized operators. In the Irish rural districts, it is understood, the frugal housewife frequently performs her rough and ready shingling upon her offspring of both sexes by slapping and shaking on their heads, and she is not to be deterred from this practice by new laws.

New English legislation provides for different treatment of mental patients of varying degree. And a somewhat reflection upon the state of trade is the provision by which the government continues to pay health insurance contributions for some 100,000 persons out of work for two and a half years or more.

BREAKS UP GAS IN THE STOMACH

Dollar's suffer from dangerous gas pressing around your heart, from indigestion, from flatulence, from indigestion. Try Dr. Williams' Pink Pills for Pale People. It breaks up gas, soothes the stomach, and keeps the acid sweet and strong, and regulates perfect. All sold drug stores.

Furs a Necessity

Market For Furs Has Not Suffered During Hard Times

The success of any business lies in the market demand. It might have been expected that during existing depression fur farming would suffer heavily. For some reason, however, this has not been the case for good furs, even at the late winter sales, brought fair prices. From this it would appear that furs are more or less a necessity, particularly in the northern countries.—Animal Report, Federal Department of Agriculture.

Not Improved With Age

In his early youth Mr. Mickleton had been a pretty child. His friends did not believe this was possible, even if he had forgotten all about it until one day he unearthed a painting of himself as a small boy from among the lumber. This he handed to his wife. "There, Sarah," said Mrs. Mickleton, proudly exhibiting the picture to her servant. "That's a portrait of your master, painted when he was a child." Sarah gazed open-mouthed at the production. "Oh, no," she said, after some moments, "what a pity it is we have to grow up, isn't it?"

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

"None of the old songs will never die," says a musician. The fact that they are murdered with great frequency seems to make no difference.

Doctor Lives On Raw Food

Advocates Simple Diet In Order To Keep In Good Health

Hard times and unemployment distress could be greatly lessened, according to Dr. Julian P. Thomas, Winnipeg food specialist, because a bushel of wheat and one bushel of oats, together with a little fresh vegetation, would keep a man well nourished for at least a year.

In support of this startling assertion, Dr. Thomas cites an experiment performed by himself some forty years ago, when he lived on nothing but raw wheat and water for a period of ninety days. At that time the wheat cost \$1 per bushel. When he started the experiment, he had a weak stomach that he could not eat sufficient ordinary food to keep going. On the raw foods he became so strong and healthy that he was able to throw his excessive energy into money.

Upon investigating the subject, he found that the people in the land of the older nations have lived as he is now living, some of them attaining such old age that modern folks do not believe the accounts, even when they occur in the Bible. The fact is, Dr. Thomas was first induced to pay attention to the diet through reading the Book of Daniel. His first experiments were started years ago, and many people whom he taught at his place, are now dead, and he is still going strong, with the firm belief that he will live one or two hundred years, and that each day of his life will be happy and vigorous.

Asthma Doesn't Wear Off Alone

Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of death, or at least stronger attacks. Dr. J. D. Kelly's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

An Accurate Clock

Designed For Timing Football Matches At All Highways, England

A novel clock has been installed on the football grounds at "Highway" England. It is a forty-two minute timepiece, and at half-time and time out, it is electrically-worked by a person. From one to forty-five minutes are marked on the face in black. From forty-six to ninety minutes are marked on the face in red. If a player is injured during the course of a match, the operator can stop the clock at once, for it is worked by ordinary clockwork mechanism. Thus this clock can be adjusted so as to measure the exact duration of actual play. This timepiece timepiece weighs one and a quarter tons without its frame and is no less than eight feet in diameter. It has been designed for the sole purpose of making the timing of football matches as accurate as possible.

Natural Gas

The consumption of natural gas in Canada during 1929 for domestic purposes was estimated to be equivalent to no displacement 640,000 tons of coal.

Exports from the United States to the Orient are again increasing.

COUGHS—COLDS

Dangerous complications can easily develop from coughs and colds are neglected. The first sign of trouble treat your throat with SPOHN'S COMPOUND.

Prize For Timothy Seed

Robt. Cochrane of Grand Prairie Awarded C.N.R. Cash Prize

In recognition of having won the world's championship for 1930 in Timothy seed, Robert Cochrane, of Grand Prairie, Alta., has been awarded the special Canadian National Railway cash prize granted at the Chicago international fair and grain show to the Canadian taking first place in that competition.

Announcement has also been made by R. English, of the Canadian National Agricultural Department, that the special prize for top place in alfalfa seed at the same show goes to Nick Chettle, of Banier, Alta., who has been a winner in this field for some years. Cochrane, too, has been taking championships at Chicago for many years, the winners of the prize, say, but this is the first time he has taken first place as a grower of timothy seed.

Friday the Thirteenth

There will be two more Fridays the thirteenth in 1931 than in 1930. Friday the thirteenth will fall three times in 1931, whereas in 1930 there was only one Friday the thirteenth. In 1931 there will be Fridays the thirteenth in February, March and November.

Man—"My wife never knows what she wants."

Friend—"Mine does; it is anything our neighbors have that we can't afford."

Nearly 50 warehouses have been built at the Salmoni Free Zone in Greece.

Extension Of Market For Honey In Baking Industry Investigated By National Research Council

Extension of the market for honey in the baking industry to increasing its use in sweet goods such as sugar cookies, rather than as a main component of bread, has been a common belief, states the report of an investigation in the laboratories of the University of Manitoba, issued by the National Research Council's Associate committee on grain research.

It has been widely held that the substitution of honey for cane sugar in the manufacture of bread would result in a more rapid rate of fermentation and in an improvement in the flavor and keeping-quality of the bread. The study now reported which was made with financial assistance from the National Research Council and the Canadian Wheat Pool by Professor W. P. Geddes and C. A. Winkler, 1930 Wheat Pool research fellow for Manitoba, disproves this suggestion.

The alternative put forward by the investigators is that honey be used where its flavor, higher sweetening power and ability to absorb moisture are particularly advantageous.

It was found that the substitution of honey for commercial cane sugar in various straight-dough bread making formulae made no significant difference in loaf volume, flavor or other bread characteristics, indicating that honey possesses in these circumstances no superiority, but is of equal value when compared on the basis of equivalent sugar content.

Figured On Yearly Basis

Worker's Income Depends On Number Of Working Days

"This city is practically bankrupt." This is a sentence which is often received from Detroit. It probably means only that Detroit is suffering keenly from the business depression, and that people there are dependent. It is a little singular that with Mr. Ford paying \$7 a day to his employees—or so the world understands—and so setting a fine example to all employers, that there should not be some measure to assist the unemployed. Mr. Ford only pays this wage to his men when they are working, and it may be that they don't work steadily.

Seven dollars a day don't mean much to a man if he only gets work occasionally. That would mean \$2, 135 a year of 300 working days. But if a man's yearly income only averages \$1,300 a year that would be only \$4 a day.

The problem for wage earners is to get a living wage by the year. It would seem that a bricklayer earning \$10 a day would really only be in receipt of \$3 a day if he only worked six months of the year.

Workingmen have to live whether their jobs hold out or not. All their calculations should be on a yearly basis.

In Times Like These

"What the country needs is men of action, in politics as well as in business," declared Hon. Alfred D. B. Maclean, K.C., Minister of Marine, in an address before the Canadian Club at Toronto. "They alone can put a stop to the trade depression which this country and all other countries have suffered in the last couple of years."

New Road Composition

A new composition for highways recently discovered in Cape Town, South Africa, is said to cut the cost of road making one-half as compared with ordinary material, double the life of the road and halve the length of time of laying.

Do you speak French?
"Yes, but I don't like it, as I have to think before I speak."—Bondage-News-Strix, Stockholm.

W. N. O. 1873

Live Stock Improvement

Dr. Rudick, Dominion Dairy Commissioner, Says Matter Needs Attention

Periodical testing of herds and direct efforts at improvement of stock are the most important questions before the dairy farmers of Canada, said Dr. J. A. Rudick, Dominion Dairy Commissioner, who addressed the annual convention of the Dairy Women's Association of Eastern Ontario.

Farmers were feeling the pinch of low prices, but, he said, the average farmer "is losing very nearly if not quite as much every year by his failure to give attention to this matter as he is through the drop in value at the present time."

"The average annual yield of milk per cow in Canada is now thought to be about 4,500 pounds, or the equivalent of just about 400 pounds of cheese. If this yield were increased by 30 per cent, which is easily possible, it would be equal to an increase of two and one-half cents a pound on the original 400 pounds of cheese made in a pound after allowing for the cost of manufacture," Dr. Rudick said.

From reports already received, the commissioner estimated butter production in 1930 was probably 10,000,000 pounds higher than in 1929.

(By Eva A. Tinney.)

Saskatchewan Seed Fair

First Prize For Marquis Wheat Awarded To O. Harrison Of Conquest

Charles O. Harrison of Conquest was awarded first prize for Marquis wheat at the Saskatchewan provincial seed fair held at Saskatoon. Mr. Harrison's sample was outstanding and was easily

George Canfield, of Wild Rose, near Shellbrook, who was champion in 1921 and 1922, won first prize in the open class for other varieties of wheat. He exhibited a sample of Red-wheat weighing 68 pounds to the bushel.

In classes of wheat limited to grain from fields entered in standing grain competitions James Carnegie, of Redbank, won first prize.

In the corresponding classes for new exhibitors, A. Robbins, Laura, was first in Marquis, and G. Mooney, Imperial, in the class for other varieties. All of the prizes in the class for varieties other than Marquis go to exhibitors of new wheat.

There is an unusually strong entry in corn in both the sections for the north and half for the south half of Saskatchewan. In the southern section, P. G. Colquhoun, Maple Creek, was first in dent corn and F. H. Chouman, Forget, in flint corn.

For the northern half, H. S. Williams, Macleod, is first in dent, and W. A. Chouman, Macleod, in flint.

Sheaves of grasses and other crops judged by T. M. Stevenson, of the field husbandry department, James and Harry Whitehead, of Saskatoon, figure prominently in the list of winners.

James Whitehead has first place in timothy and Brome grass, and Henry Whitehead first in alfalfa, red clover and sweet clover. Jack Darnborough, Laura, led in western ryegrass; E. Green, Laura, in crested wheat grass; and P. Trowel, Saltcoats, in alfalfa clover. The class for sheaves of flint corn was a large number of entries but various members of the Colquhoun family of Maple Creek take all four prizes.

Northern Resources

Coal, Oil, Gas and Minerals Found In Peace River Block

Rich new resources of oil, gas, and minerals in addition to the vast agriculture and timber lands, have been added to the future wealth of the Peace River block, it has become apparent since the inception of a survey of the area undertaken by the British Columbia government in association with the two transcontinental railway systems. While detailed reports of the survey under the direction of Major C. B. Crysdale have not yet been presented, indications pointing to important discoveries in the lands recently ceded to the province from federal control have been brought to the attention of the provincial authorities it has been learned.

The scanning at the Peace River block, "What did Paul Revere say at the end of his ride?" "French!" "Whoo!"

WAS IDOL OF FRANCE

Marshall Joseph Joffre, hero of the Marne and commander-in-chief of French armies 1915-17, who died in Paris following an illness that necessitated amputation of one leg. The marshal, bearer of British Order of Merit and Grand Order of Legion of Honor, would have been 80 years old January 4.

Interesting character study of Marshall Joseph Joffre, hero of the Marne and commander-in-chief of French armies 1915-17, who died in Paris following an illness that necessitated amputation of one leg. The marshal, bearer of British Order of Merit and Grand Order of Legion of Honor, would have been 80 years old January 4.

RESIGNS POST

A. T. Rykoff, chairman of the council of people's commissars of the Soviet Union, who has been relieved from his position at his own request. Rykoff, who is to be succeeded by Vladimir M. Molotov, has had several conflicts with Josef Stalin, chairman of the central executive committee of the Soviet Union, and the removal of Rykoff will bring more harmony to Soviet Union.

Trade With China

Demand For Canadian Flour and Wheat In Chinese Market

Inquiries for Canadian products have been received by L. M. Cosgrove, Canadian trade commissioner at Shanghai, as a result of the recent visit of the Canadian trade delegation to China. Mr. Cosgrove finds the visit helped to create an atmosphere of goodwill.

Normal trading will likely be resumed during the spring of 1931. Fair transactions have recently taken place in Canadian flour and Canadian wheat. Lumber exports to China have shown an increase and, due to direct steamship service from British Columbia, Canadian lumber now occupies a prominent place in the Chinese market.

Demand Equitable Rates

Will Insist On Proper Ocean Rates and Marine Insurance For Canadian Cargoes

Frank Kilgus, secretary of the United Farmers of Canada, Saskatchewan section, announces the determination of the executive officers of his organization to support strongly the demand of the Saskatchewan government for the application of proper ocean rates and fair and equitable marine insurance rates on cargoes of grain and other export traffic from Churchill, on the Hudson Bay route, to British and continental ports.

Would Not Need It

A newspaper dated July 26, 1860, just found in Glasgow, Scotland, contains the following item: "Three clergymen after dinner, ate 14 quarts of nuts, and during their sitting drank six bottles of port wine, and no other liquor."

Life Story Of J. B. Tyrrell, Eminent Canadian Geologist, Makes Interesting Reading

Canada's Bacon Trade With Britain Small

Dominion Could Supply Market Now Served By Denmark

Canada supplied only 89,169 hundred weight of bacon to the United Kingdom in the 10 months of 1930, according to trade returns. The value of the imports of bacon was £34,922,062, of which the value of Canadian bacon was £133,365.

Importation of Canadian hams by Great Britain is quoted as 70,968 hundred weight of the total imports of £65,035 for the 10 months.

Commenting on the amount of Canadian bacon and hams placed in the British market, W. Waldron, provincial markets commissioner, said recently: "The marketing of Danish bacon in England is carried on to a great extent by the Danish Bacon Company, Smithfield, London. English Bacon is received by this company from 40 factories in Denmark. The company has depots at London, Hull, Leth, Liverpool, Manchester, Chester, Barrow, Newcastle, Stoke-on-Trent, Birmingham, Cardiff, Ipswich, Exeter, Portsmouth and Bristol. Denmark has concentrated on the export of bacon to the United Kingdom, as it is well established in England and her bacon is popular."

Mr. Waldron continued to say that the sales of the Danish Bacon Company in England reached £30,000,000 a year and that all the Danish bacon imported by England was not handled by the bacon company.

Loss From Insect Pests

Damage To Saskatchewan Crops During 1929 Amounted To Over Ten Million Dollars

The year 1929 is referred to as one comparatively free from spectacular outbreaks of insect pests. But, the annual report of the Dominion Department of Agriculture cites as a conservative estimate of the damage by the major insect pests to the wheat crop in Saskatchewan alone \$10,012,000.

A survey of \$26,000 in one district in Alberta through a local control campaign in connection with the sugar beet crop, and another case of a survey of \$8,000 on one farm alone as the result of control work with the wheat stem sawfly, show rather conclusively the value of the work being carried out under the direction of the Entomological Branch of the Dominion Department of Agriculture.

Financial Expert Gives Cause Of Depression

Men Unable To Control Machine They Have Created

"Human beings have not learned how to control the machine they have created," declared Sir Basil Blackett, noted British financial expert, when questioned as to the cause of the present world-wide depression on his arrival at Montreal. Sir Basil is a director of the Bank of England, and chairman of the Imperial and International Communications, Limited. Financial member on the executive council to the Viceroy of India, Sir Basil is well qualified to speak on that country, which, he said, was ready for a greater measure of responsible government. He expressed pleasure in the appointment of Viscount Willingdon, governor-general of Canada, as the next Viceroy.

Powdered Milk

Saskatchewan Government Will Encourage Manufacture Of Product

The Saskatchewan government is fostering plans to encourage the manufacture of powdered milk, as used extensively in the British Isles, by those poultry raisers who provide the British market with milk-fed chickens. The possibilities of such an industry are emphasized by W. Waldron, provincial markets commissioner, who is back from the World's Poultry Congress in London, England, and who points out that part of the manufactured product could be used for prairie-raised birds.

Bee-Keeping Profitable In Alberta

Bees have proven to be a very profitable and practical division of agriculture in Alberta and today represent one of the province's youngest and fastest-growing industries, in the opinion of H. L. Luther, head beekeeper at the Lethbridge Dominion Experimental Station.

Scientists, particularly Canadian scientists, are a very modest lot, and it is often hard to get at the facts of their work, the real gold of science which often underlies their careers.

For this reason a biography of that eminent Canadian geologist, J. B. Tyrrell, written by his life-long friend, W. J. Louden, B.A., will be welcomed, as it tells a remarkably interesting story with plain, worthy clearness and throws much light on this type of explorer-geologist who has made such a big contribution to the development of Canada.

Mr. Louden tells of the geologist, as a boy in Weston, Ontario, wandering after school hours about the woods collecting specimens of rocks and fossils. He tells of the claims for the use of the revolver and rifle, going to Upper Canada College, where, when sixteen years of age, he received recognition, and thence to Toronto University, where he annexed the highest honors in geology, chemistry and physics.

Then we see Tyrrell coming to Ottawa to take a position with the Geological Survey and his explorations for many years in the far West and the far North. That was in the early eighties, when Calgary and Edmonton were little villages, when there still remained the plains and the prairie plenty were the lot of the pioneer. Journey after journey was made to the Hudson Bay, to the foothills of the Rockies, through Saskatchewan and Manitoba, and to the outposts north of latitude 55.

Particularly important were Tyrrell's surveys in the Red River basin. Confining in this area was then a dream of the future, and its subsequent development owes much to the splendid reports turned in by this great geologist. He was the first geologist to make a geological map of the remains of dinosaurs, those gigantic animals which millions of years ago wandered in the foothills of the Canadian Rockies. He was the first to make a geological map of the remains of dinosaurs, those gigantic animals which millions of years ago wandered in the foothills of the Canadian Rockies.

Tyrrell was sent to the Yukon just before the great gold rush of '98. The lure of gold got into the blood of the new stars, for a time, then property came to be valued. Contracts for expert opinion poured in, claims were taken up, companies formed and for some years his income ran to \$50,000 a year.

But the day of placer mining was passing; he failed to get the financial support for his biggest property, he was involved in costly litigation, and by 1905 he decided to bid farewell to the Land of the Midnight Sun. In this part of the story we see Dawson as it really was, a town of wild license, of mad gambling, of hard days and hard nights, when abundance from the river bed followed by wild nights when it flowed into gambling halls, into the churches of painted women, and was squandered on the turn of a card.

Tyrrell came back from the Yukon untainted by the excesses of many who had been lured by the spell of El Dorado, but not much richer in pocket. Later he accepted a very remunerative position as chief geologist for a great Anglo-French mining corporation and continued his explorations and investigations in every part of the Dominion, but particularly in Northern Ontario. A few years before the Great War he made the most important survey of the Hudson Bay district ever undertaken at the request of Sir James Whitney. Still hale and vigorous at 75 he is today recognized as one of the greatest mining and geological experts on the continent—Ottawa Journal.

The man who tells you he is no fool may be only mistaken.

"Why did you steal this gentleman's watch?" "Because I thought it was a gold one."—Lustige Koster Zeitung, Cologne.

Retirement Closes 53 Years' Service

Over 53 years ago, a 14-year-old boy joined the old Toronto, Grey and Bruce Railway, as an apprentice in the Motive Power Department. Today, the retirement of Robert Preston, superintendent of motive power, Eastern Lines, Canadian Pacific Railway, closes a career which is something of an epic in the history of C.P.R. as a railroad.

R. Preston

Preston, from machinist in 1878, served in various parts of the Dominion, successively, as locomotive foreman, master mechanic and superintendent of motive power on both Western and Eastern Lines. He intends to make his home in Toronto, where he is well known and saw many years of his long service.

He is succeeded by George Whitley, who has been his assistant since 1915 and also has a long record in the service of the company, having started as a freeman, at Port William, Ont., in 1902. His employment in various posts of the Motive Power Department, however, has taken him over the Prairies and into Eastern Canada.

G. Whitley

The post of assistant superintendent of motive power on Eastern Lines will be filled by Alexander Peters, who leaves his appointment as master mechanic of the British Columbia Division in the East. He joined up as a machinist in the Winnipeg Shops in 1907, and in various parts, Lethbridge, have all been West of Port William.

About Town and Country

Alex. R. McTavish, sight specialist, will visit the hotel at Oyen, on Tuesday, Jan. 27. Dependable eyesight service and repairs.

Under the auspices of Somme Chapter No. 35, O.E.S., a whist drive and dance will be held in the Masonic Hall, Oyen, on Friday, Jan. 23 (celebrating Robbie Burns' night). Everybody welcome. Admission 50 cents.

Mr. S. A. Miller returned to Oyen last Friday after a short business visit in Calgary.

William Desmond of Glidden, Sask., was a week-end visitor in town.

Mr. J. J. Parrell, who was a business visitor in Calgary last week, returned to Oyen Friday.

Died—At Yorkton, Sask., on Jan. 31, 1931, Hilda Isabel Walters, beloved wife of William J. Miller (formerly of Oyen). Service was held at Holy Trinity church, Yorkton, Sask., on Monday, Jan. 5, at 3 p.m. Funeral from Speer's undertaking parlor, Regina, Sask., Wednesday, Jan. 7, 1931, at 2 p.m.

Jack Evans, Dr. McGregor, Bob Nisbet and H. L. Packard played tennis on the local courts a few days ago, and found some quite dusty; and past the middle of January.

During the absence of Mr. M. G. Whitlock, Mr. E. Pfeiffer of Chinook is at the local depot.

OBITUARY

Mrs. ANNIE HOOVER

The death of Mrs. Annie Hoover occurred at Langdon, Alta., on Sunday, Jan. 11, 1931. A funeral service was held in the United church, Langdon, on Tuesday morning, Jan. 13, after which the body was conveyed to Sturgeon Creek cemetery for interment.

Mrs. Hoover, who had been in failing health for over a year suffered a stroke last fall and a second stroke about a week before her death. Mrs. Hoover died in her 76th year. She was predeceased by her husband who died in 1926, and is survived by four sons and three daughters, of whom the following were with her when she died: Mr. and Mrs. W. Hoover of Hawkesdale, Mr. Hudson Hoover of Calgary, Mrs. Patmore of Crossfield and Mrs. Albert Hudson of Langdon. Mr. A. O. Hoover of Emo, Ont., and Miss Gertrude Hoover of California, were unable to be present.

Burns' Program at Young People's Club

At the regular meeting of the young people's club held last Monday evening, an excellent Burns' Night program was given by the members as follows:

Mr. E. G. Evans gave a very interesting talk on Scotland's national bard. Mr. J. Shields sang. Mr. Major Edridge, a selection on the organ and two songs. A male quartette, R. Nisbet, H. Austin, R. Cutlan and H. Bradford, sang two numbers "Lassie o' Mine" and "A Wee House on the Hillside" and Mr. Robert Nisbet sang two solos.

Sue E. Reid is president and Mr. E. J. Scott is acting secretary for this month. The club will meet again next Monday and a cordial invitation is extended to all to attend.

Victoria and Vancouver Mecca for Tourists

FLOWERS BLOOM ALL WINTER

THE LIONS VANCOUVER

PENDRYN'S GARDENS, VICTORIA

A Christmas rose plucked in the garden is no novelty in the flower vase of a Victoria or Vancouver automobile. For the climate of these two British Columbia cities is so mild during the winter that both claim eternal summer. The car, can drive, approach the ground, not on a real grass even practically every day in the year, and hundreds of miles of splendid roads are in first class condition the year round for motoring. The mild climate is largely due to the warming influence of the Japan current and protecting range of mountains. Victoria, capital of British Columbia, is a city of rare charm with its beautiful drives and residential sections, its first class golf courses to which access is easily obtained by the player, its unique Chinese quarter, its famous Hingay, its recovered Empress Hotel and its imposing parliament buildings. Both the Victoria Golf Club and the Colwood Golf and Country Club have entertained thousands of guests in a single year, and offers stopping at the Empress may play at both upon payment of a "small greens" fee. Victoria is noted for its magnificent drives leading through beautiful streets, along the ocean's shores and far into the interior of the island. Victoria is at the southern tip of Vancouver Island, named after Captain George Vancouver, of the British Navy, who discovered it in 1792. Its trees, among them the stately Douglas fir which towers 800 feet above the roads over which the traveller glides, are magnificent, many of them being 6 or 7 feet in diameter. Century-old cedars and gnarled oaks of great age are conspicuous features of the landscape, and miles of horse, or Scotch broom, line the highways.

Like Victoria, Vancouver has been a wonderful road builder and has hundreds of miles of splendid automobile roads of the first macadam. Vancouver is surrounded by towering mountains and the famous "Lions", twin snow-capped peaks, are one of the many scenic beauties of a most interesting, bustling and interesting city. The "Lions" also called the "Lions' Gate" and the "Two Sisters", tower 6,500 feet above Vancouver, and an Indian legend has it that as long as the "Two Sisters" stand guard over Vancouver, just so long with Canada's greatest Pacific port thrive and develop.

Victoria is the site of the Crystal Gardens, erected several years ago by the Canadian Pacific Railway and which have become the sports facilities of the city. The gardens are equipped with a magnificent 150-foot swimming pool, completely covered by a canopy of glass. Here the inhabitants of Victoria and visitors flock in thousands to enjoy the sports facilities of the institution. Dancing and other forms of entertainment are always in progress. Here, too, are staged swimming meets that within the past few years have become international in aspect.
